my time at portia - original soundtrack

The Best Shooting Chaos Game in 2D. screen gameplay on top, you better try this. If you can survive up to 20 Days. You are the awesome with the Gun's bullet down in the Blood of Chaos Zombies. Even Co-op, Build a turret and and more barrier to Defend Ourselves~. Do not I repet DO not buy this♥♥♥♥♥!!!!!!

That lags crashing the game all time:(. I glad I'm one of the first to review this because this game is amazing. Cosmic Leap is in incredibly fun game is which you jump from planet to planet trying to reach your rocket-ship. The game (haven't beaten it yet) I imagine will get a bit harder as the ways to jump from planet to planet should continue to get more complex. The puzzles of jumping to planet to planet are challenging but not to the point of being unfair, and the soundtrack is incredible. The game also gives you a wide variety of characters (40 of them) to unlock as well as 9 different rocket ships. It works great with a controller and has a very fun retro feel and style to it. If you're looking for a fun, colorful, slightly challenging game to play than this one is for you! Plus, how can beat a price of \$2? 10V10 looking forward to playing much more!

For those looking for gameplay before buying it, you can find my playthrough (1080p, 60 FPS) of the first couple levels here.

EDIT: It's to bad the majority of you don't find my view helpful but I really do think this is a game worth playing. And no, I'm not a dev for this game in case you think my review is a bit over exaggerated. However when I see a game I think deserves attention I try to sell it as hard as I can. If you thought I oversold then I apologize but I call how I see it, and I see a great game here.. level design

+ graphics

+ music

- loading screen

- easy

- story

- end

- short. The game is halfway decent, not 10 bucks decent, maybe \$2.99 - \$4.00 at the most decent.. Now i know how to Dev a game xD

It's a great game..

Only take an hour to finish this game

Thanks Dev for making this game :D

\*Thumbs up\*

---

I purchased the Dollar Dojo bundle on Fanatical and wondered how they can sell all these games for \$1.00.

I wonder no more.. Asymmetrical movements in a fast-paced level bring good feelings, when you finish the level with 3 stars. It is worth.. I enjoy this game a lot actually. Have yet to beat the game but it offers a challenge with having to figure out the controls yourself which is easy for any true PC gamer. The atmosphere of the game is very unnerving and unsettling. If you do not like older games I would not recommend it to you since it is much like an old style game with new graphics. I love the puzzles and how far the saves are spread apart. When you hit a save point you feel like you achieved something.. I did not use this game to farm trading cards.. This is very good software.

My only complaint is the intermittent captcha questions coming up on export, that's really annoying when when processing loads of scans and doing multiple exports of the same thing.. After trying out EU4 for a free weekend on steam and my being unable to purchase a 40 dollar game, i was starving for some Europa Universalis action... And then i found this for only 2 dollars...

And while i made this purchase on somewhat of a whim i do not regret it (not just because of the price i got it at, which is practically nothing). For the Glory is a pretty good spin-off game and it has a few mods built in which you can enable or disable. It's a bit slow on new systems. It also tends to crash every so often SO SAVE EVERY CHANCE YOU GET, MULTIPLE SAVE FILES ARE YOUR FRIENDS!

I think the reason it tends to crash for me is because i'm playing on Windows 7. I'm told this game works best on a machine with Windows XP, but the game still manages to run fine despite the occasional crash. When it does get crash-happy though (something i've only encountered once as of this original posting of this review), that's probably a sign from the universe telling you to stop playing and go back to sleep, though on average, the same only crashes once or twice and my game-session is usually smooth the rest of the way (and i play my games without mods). According to the small community for this game, it's almost impossible to run on Windows 8 which is a real shame. I'm also unsure of what'll happen to you Windows 10 users who buy this game and may not be able to run it. Then again, modding is a thing so you may be able to run it with some help from the community, so if you have a newer operating system don't be afraid to ask around on the forums first.

Compared to the new EU4 i find For The Glory a lot easier in comparison. It doesn't have as many menus as EU4 and it's pretty simple, especially if you're new to Europa Universalis. It's the same level of addicting (you'll spend hours and lose sleep over your nation expanding and surviving the test of time), the graphics are a little dummed down compared to the newer games because this was a game made for XP afterall, but it's nothing too bad to look at. The game also has a number of cheats and mods that can be used in the game if you feel like giving yourself an advantage.

The only flaws i really have to complain about with the game is the crashing and that it doesn't have any steam interface built in (so if you want to talk to your friends while you play, that's out of the question because you don't get any pings to indicate that your friends are trying to talk to you). The crashing probably comes from the fact it was made for Windows XP and i'm lucky i can run it on Windows 7. Another complaint i have is the fact that i can never seem to get Windowed mode to work and the game will refuse to run unless i play full screen mode. If i try to set it up to play it windowed, the game just refused to launch period. But it's not a big deal for me. I can however imagine that scenerio sucking for someone with a lot of chatty Steam friends though and because this game doesn't have Steam interface and because of my experience with Windowed mode not working, you may just wanna ping your Steam friends and tell them that you're going to play a game that won't allow you to talk to them for a while...

Still, if you want some EU and don't wanna shell out any big bucks (especially if you're just starting to get into EU as a series), For the Glory is a good start and a good alternative. It's also the cheapest. I only got it at 2 dollars because it was on sale (which is extremely lucky) but the normal price is around 10 dollars. Still, if you like the EU series or grand strategy games, i can totally recommend this one.

I give For the Glory 4.75 shields out of 5

And if you do want cheats, i also have this guide:

<http://steamcommunity.com/sharedfiles/filedetails/?id=413111842>. Sound error CTDs every second minute sometimes, sometimes not at all. I weep for my favorite childhood game.. Pretty good for the price. While TIE Fighter may be a visually superior game (the generic HUD elements in this one are lazy) The story of a family run shipping company being swept up in galactic civil war makes this one of the best Star Wars games ever!. i paid for this
